Homeostasis at the cellular level is
critical to maintaining homeostasis in
the whole organism. Animal cells have
several ways to help them stay in
equilibrium. Cell Membrane and
Phospholipid Bilayer The cell membrane
functions as a boundary separating the
internal cellular environment from the
external environment.

AP Biology Notes: The Cell Cycle and Homeostasis - Kaplan ...

Introduction: Homeostasis is the maintenance of a constant internal environment. An important aspect of homeostasis is temperature regulation. Temperature regulation in plants
If a plant is too hot (e.g. during the summer), then it will increase transpiration in an effort to cool down.
Temperature regulation in animals
Temperature regulation in animals is much more complex...
