The Soundscape - Inner Traditions

A soundscape is the acoustic environment as perceived by humans, in context. The term was originally coined by Michael Southworth, and popularised by R. Murray Schafer. There is a varied history of the use of soundscape depending on discipline, ranging from urban design to wildlife ecology to computer science. An important distinction is to separate soundscape from the broader acoustic environment. The acoustic environment is the combination of all the acoustic resources, natural and artificial,

Soundscape - Wikipedia

Soundscape suggests exploring all of the sound in an environment in its complexity, ambivalence, meaning, and context. Basically, the soundscape concept considers the conditions and purposes of its production and perception. Conse-

quently, it is necessary to understand that the evaluation of noise / sound is a holistic approach.

Exploring Our Sonic Environment Through Soundscape ...

The geophysical environment produces a variety of in situ, contextual ambient sounds. Familiar such sounds are wind, rain, and running water, the frequencies of which occur between 100 Hz and 1 kHz with little rain, or between 100 Hz to 8 kHz during windy or moderate to heavy rain.

Soundscape Ecology: The Science of Sound in the Landscape ...

Sound, when understood as an environment, is a soundscape: a powerful tool that helps humans relate to their surroundings. They can be consciously designed by an individual or group of individuals, or the byproduct of historical, political, and cultural circumstances.
